INSECTICIDE GROUP CODE: 1B

ACTIVE INGREDIENT: Dichlorvos (Organo Phosphate)124 g / kg

330 ml

HARMFUL

HARMFUL

WARNINGS

- Handle with care. Disregard of warnings can have serious consequences.
- Do not use in grain mills, silos, stores or warehouses containing unsealed edible commodities.
- Flammable - do not spray near open flames or naked lights.
- Do not expose container to direct sunlight or temperatures above 50°C.
- Do not puncture or incinerate can.
- Keep out of reach of children, uninformed persons and animals.
- Poisonous by inhalation or contact with the skin.
- Store away from food and foodstuffs.
- Toxic to fish, wildlife and birds.
- Only to be used by trained personnel.

PRECAUTIONS

- Prevent contamination of food, utensils and drinking water.
- Remove pets and cover aquaria prior to application.
- May stain plastic materials or highly polished surfaces.
- Do not eat, drink or smoke during application.
- If it is necessary to enter premises under treatment during application or within 6 hours wear a respirator, goggles and protective clothing.
- Do not inhale. Avoid contact with the skin by wearing gloves and an overall and wash off any splashes with soap and plenty of water.
- Wash all food handling equipment after treatment.

DIRECTIONS FOR USE: Use only as directed

Close doors and windows and switch off ventilation. Before activating the Nuvan Profi aerosol, place the can in an upright position on top of a newspaper or a flat carton before depressing the trigger valve in the space to be treated. Activate the can at a safe distance away from sensitive painted/plastic surfaces and electrical appliances. Remove all vehicle/s from garage/s or areas to be treated before fumigating the area. Where more than one aerosol is required distribute them evenly throughout the area. To activate, press trigger until it is locked in the spray position. Leave room immediately. The entire contents will be released. Always activate the aerosol furthest from the door first. The room should be left closed overnight where possible or for at least 6 hours before entering. Total spray duration per can is about 5 minutes, which is sufficient to treat from 150 m³ to 600 m³ of space, depending on the type of pest to be controlled (see table). Follow the precautions regarding re-entry of freshly treated premises.

PESTS	ONE CAN SUFFICIENT FOR
FLYING INSECTS (e.g. moths, flies and mosquitoes).....	600m ³
STORED PRODUCT PESTS (e.g. grains and flour beetles, weevils and their larvae).....	300m ³
CRAWLING INSECTS (e.g. cockroaches, fishmoths, mites, lice, fleas, crickets, bedbugs and carpet beetles).....	150m ³
