## WARNINGS

- Do not place can in direct sunlight or near hot elements such as stoves and heaters.
- Keep out of reach of children, uninformed persons and animals.
- Do not puncture or incinerate container.
- May cause irritation to the eyes, skin and mucous membranes.

## PRECAUTIONS

- Avoid excessive inhalation and food contamination.
- Avoid spraying over highly polished and plastic surfaces e.g. home appliances.
- Cover fish bowls and tanks before use.
- Do not spray in the presence of persons with known sensitivity to pyrethroids.

## DIRECTIONS FOR USE

USE ONLY AS DIRECTED.

The Synmatic metered aerosol is intended for use with an automatic dispensing machine.

The unit and its accurate timing mechanism will ensure the firing of the insecticidal aerosol every 15 minutes thereby successfully controlling flying insects such as flies and mosquitoes when under continuous operation.

The aerosol will last for approximately 720 hours (30 Days) giving 3 200 sprays.

**Installation Notes:** It is important that the unit is positioned approximately 2 (two) meters above the floor but not directly over exposed foodstuff.

One dispenser is suitable for a premises/room of up to 180m<sup>3</sup> (8.5m x 8.5m x 2.5m). In larger areas calculate the number of units required to treat the space.
